

time after a disaster, implementing self sustainable programs in or close to the area, also helps to stimulate the weakened local economy.

The ISC will assist with disaster stricken areas—in its international and national capacity—to prevent and alleviate human suffering wherever it may be found. Its purpose is to protect life and health and to ensure respect to all human beings with compassion thereby strengthening faith.

**How good and
pleasant it is
when God's people
live together
in unity!**

OUR OBJECTIVES

Our goal is to establish a church where we can develop a Green Community then strengthen by example, teaching the communities around us a better way of living. We will impart disaster planning, sustainable living practices and also act as disaster relief in emergency situations.

GROUND FLOOR OF CHURCH

The best way to help the ISC is through Donations. Your contributions allow the ISC to purchase exactly what is needed to implement these programs and plan for the future — whatever may come. Donations will also help to implement programs for sustainable development close to the disaster sites, which avoids delays and transportation costs to get basic necessities to disaster victims — fast.

Because affected areas generally experience significant economic loss for some

OUR VISION

ISC, is a worldwide ministry of Anabaptist churches, of the Amish Mennonite faith. We share God's love and compassion for all in the name of Christ by responding to basic human needs and working for peace and justice. The ISC envisions communities worldwide in right relationship with God, one another, and creation.

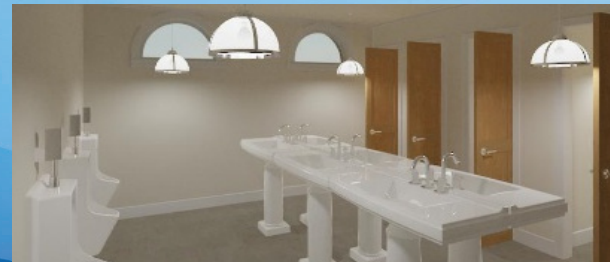

We are committed to being inclusive of all people regardless of culture, race, class, gender and age. We seek to dismantle racism and oppression, and to encourage the work of liberation in marginalized communities and provoke change in privileged communities. We value the theological differences among us, and desire to promote understanding and respect.

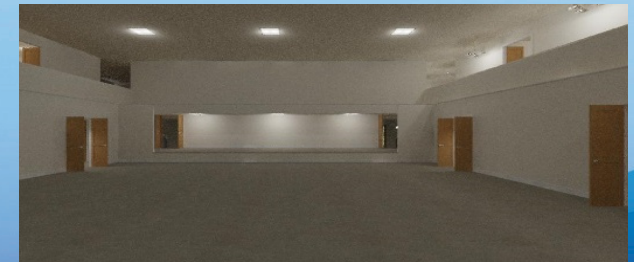

With your donations we will build a place to congregate and coordinate our efforts towards solving the problems of today for a better tomorrow. We have plans for abundant food production through aquaponics. Not just providing a meal, but a way for the community to always have nutritional meals and thrive — providing for itself is the goal we look to accomplish. It does no good to give someone a meal today to starve to death tomorrow. In the twenty first century when we can automate most causes for profit we still have not solved the basic needs of food and shelter throughout the world.

Through use of an aquaponics system covering only three acres of land, we can produce over a million pounds of food a year. With expansion, we'll create churches and like systems throughout the world — solving hunger is a very real and achievable goal.

We will not only support the ISC community, but other communities around us as well. By peaceful example we can show the world “a better way”. Would you like to be part of a community of this type? Contact us for more information.
